

## Discipline 8 – Shot 4c – 9 points

### Cue Ball

Frozen to the cushion and at the **2nd** diamond, as diagrammed.

### Object Balls

13 object balls are placed in a standard rack formation (with the head ball missing) around the cue ball as diagrammed. A blocker ball is on the **3rd** diamond and exactly 1 ball + 1 chalk's width from the cushion. 'F' ball is hanging.

### Objective

Masse the cue ball, causing the balls in the rack to scatter. The end ball will get out of the way (and may not pass between the rail and the blocker ball), and the cue ball will masse along the cushion, between the blocker ball and the cushion, and make 'F' ball.

### Special Notes

Players must perform a full masse. **Masse stroke must be performed in one fluid motion. It is possible for the tip to graze the blocker ball to the right of the cue during the downward stroke but it is not legal to swipe the blocker ball out of the way with the side of the cue stick.** The blocker ball may not be hit by any means until after 'F' ball is made. The 'F' ball must be made by the cue ball. It may not be made by an object ball.
